## Inject-Ease® *Injections Made Easy*

Conquer the technique and anxiety of injections with the Inject-Ease, the device that makes injections easy. Simply place a loaded syringe in the Inject-Ease, place the tip against the skin, and press the button to automatically deliver the needle through the skin. You control the rate at which the medicine is injected.

- Usable with subcutaneous injection treatments, including diabetes and other conditions
- Special tip & technique- helps reduce the pain by masking the needle puncture
- One press of the button inserts the needle through the skin automatically and easily
- Part #IE400

## Insul-eze® *Syringe Magnifier*

One-piece syringe magnifier that holds syringe and insulin bottles in place for those with visual or manual dexterity problems.

- Aids in syringe loading for visually impaired
- Magnifies all syringe calibrations two times for easy reading
- Holds syringe and bottle firmly while drawing dosage
- Part #IZ6000

## Insul-Cap® *Stores, Identifies Bottles, and Helps Load Syringes*

Insulin bottle caps designed to aid in storing, identifying and making drawing insulin into a syringe easier.

- Allows one-handed syringe loading
- Fits most standard syringes and insulin bottles
- Keeps bottle tops sanitary
- Part #IC200S

## Ambi-Tray® *Insulin Bottle Tray*

Small and sturdy Insulin bottle holder that keeps bottles organized and standing upright.

- Fits most standard insulin bottles
- Easy to put on, store and remove
- Part #ITR500S
