FOR IMMEDIATE RELEASE

## **AMBIMEDINC RELEASES HAN-EASE - HIDE-A-NEEDLE FOR PEN INJECTORS**

**Capitola, California** – August 11, 2023 – AMBIMEDINC, Designer and Manufacturer of World Class Medical Devices released the **HAN-Ease** at the August Association of Diabetes Care & Education Specialists (ADCES) Annual Meeting in Houston, Texas. The **HAN-Ease**, also known as **Hide-A-Needle**, is a device that locks onto injector pens, hiding the needle when administering subcutaneous injections.

The **HAN-Ease** received acclaim from the Diabetes Educator community for its simple, easy-to-use design that when added to the base of a Pen-Injector, allow those who have needle phobia or limited hand dexterity to administer their own medicine with less stress and anxiety. The **HAN-Ease** is held steady against the skin, alleviating stress for those with shaky hands. And the special design of the **HAN-Ease** helps reduce pain by masking the sensation of the needle puncture. While the **HAN-Ease** can be used on a Pen-Injector that contains non-insulin medicine, the Diabetes Educators are especially excited to show the **HAN-Ease** to their pediatric diabetes patients.

Jill Tracy, president of AMBIMEDINC recognizes that many people have difficulty with their self-Injections and the **HAN-Ease** will allow more people to administer their necessary medicine with less stress and anxiety. The **HAN-Ease** fits most Pen-Devices that have needles size 4mm-12mm.

### **About AMBIMEDINC**

AMBIMEDINC is a U.S. manufacturer of world class medical device products for distribution in more than 40 countries and is known for its quality standards and innovative medical products. As a leading diabetes product manufacturer of reusable devices and injection aids for the diabetes market, AmbiMedInc strives to bring new and helpful products to the diabetic community.
