FOR IMMEDIATE RELEASE

AMBIMEDINC RELEASES INSUL-EZE SPM - A NEW SYRINGE MAGNIFIER FOR PEN DIAL INJECTORS AND LARGE SYRINGES, ENABLING CORRECT MEDICATION DOSES FOR THOSE WITH LOW VISION

Capitola, California – August 1, 2023 – AMBIMEDINC, Designer and Manufacturer of World Class Medical Devices released the **Insul-eze SPM** at the August Association of Diabetes Care & Education Specialists (ADCES) Annual Meeting in Houston, Texas. The Insul-eze SPM is a magnifier that fits over pen dial injectors and large syringes.

The **Insul-eze SPM** received astounding praise from the Diabetes Educator community for its sturdy, easy-to-use design that when added to a Pen injector or large syringe, allowed those with visual impairments to see the level of medication on the syringe body and dose dial. The Insul-eze SPM magnifies the calibrations over two times for easy reading, enabling those with visual problems to acquire the correct medication dose.

Increasing the viewing area on the dose dial of Pen Injectors and large syringes was a common request from diabetic educators, so the AMBIMEDINC engineers got to work and designed the Insul-eze SPM. Jill Tracy, president of AMBIMEDINC states that the Insul-eze SPM will make a difference for many people with vision problems to receive the correct insulin (or other medicine) dose. The Insul-eze SPM fits the dial of most pen-injectors and the barrel of 3ml, 5ml and 10ml syringes.

About AMBIMEDINC

AMBIMEDINC is a U.S. manufacturer of world class medical device products for distribution in more than 40 countries and is known for its quality standards and innovative medical products. As a leading diabetes product manufacturer of reusable and disposable devices for collecting capillary blood samples as well as injection aids for the diabetes market, AmbiMedInc continues to strive to bring new and helpful products to the diabetic community.
